

#### Step 4 - Position plastic guide to mark center of hole on battery cover

A. Unscrew the front push pin #1 that holds down the battery cover. Once it stops, pull out the push pin assembly easily with fingers.

(See overall illustration above for push pin location and Illustrations 1 & 2 to the right for removal).

B. Insert the push-pin thru the larger hole in plastic drill guide and then back into the hole it came from. Now rotate guide until it aligns to the **plastic** edge of the battery cover - (The border of the rubber seal surrounding the battery cover) (Illustrations 3a & 3b)

(For right hand drive vehicles, the guide should be flipped over so it will align to your battery cover as it is a mirror image of the one shown).

C. Mark the center of the small hole at the top of the drill guide while keeping the guide aligned with the edge of the plastic as shown.
